

Tom Quick - Program Management, UX

Portland, OR 503-750-5106 tomquickcontact@gmail.com [linkedin.com/in/tomquick](https://www.linkedin.com/in/tomquick)

Results driven leader for product delivery, customer workflow focused design, and project team success with 17 years of experience in project management, user experience problem solving, quality assurance management, and design implementation.

Strong command of business, technical, and communication requirements, logistics and potential. Skilled at group processing and troubleshooting, with a bias towards definitive action. Expert at efficient tactical decision making and risk management, communicating key details relevant to managers and individual contributors as needed.

Passionate about product delivery, usability, user workflows, and team coordination. Focused on lean, viable, release planning and execution.
